Casement & Awning Window System

The Product of Progress

Distinctive Elegance, Perfected Performance

The EVOLUTION SERIES

is an elegant, high performance window system designed to enhance the appearance and energy efficiency of any home.

INSPIRATION + INGENUITY = EVOLUTION

Evolution happens over time. Species adapt and improve. Like nature itself, the EVOLUTION SERIES brings together inspired design, technical ingenuity and generations of expert craftsmanship. This innovative PVC Casement & Awning window system has been engineered utilizing advanced European technology, meeting the exacting standards of North America's retrofit and new home markets. Complement your home with the enlightened features of the EVOLUTION SERIES window system.

Through innovative designs the EVOLUTION SERIES CASEMENT/AWNING SYSTEM can easily be adapted to accept extruded aluminum exterior profiles. Through this enhancement the EVOLUTION SERIES gains the proven performance and elegance of rich coloured exterior aluminum surfaces to compliment the existing efficiency and versatility of the window system.

Exterior Profile Installation Options... because every situation is different.

The EVOLUTION SERIES window system manufactures a variety of exterior profiles. When reviewing the installation method that works best for you, consideration should be given to the placement of the window in relation to the interior plane of the wall. Surface temperatures of the glass or frame can be affected by the location of the window. Setting the unit towards the inside allows the room heat to increase the inside surface temperature of the glass and protect the exterior of the unit from the outside elements. This allows for optimum thermal performance and reduces the risk of condensation.

Common characteristics for the Hybrid Series

Test Results A440-98: **A3, B7, C5**

Test results as per GP304

- Triple seal construction
- PVC multi-chambered frame
- Increased versatility with competitive pricing
- 4 1/2" extended frame (GP304)
- Structural construction for larger viewing area or modular construction for versatility
- Thermopane is located over 25% further inside the wall than any 3 1/4" frame
- Brick molding of various types can be added
- For new construction or retrofit; ideal when installation must be done from the inside of the building
- Aluminum extrusions are available in many colours

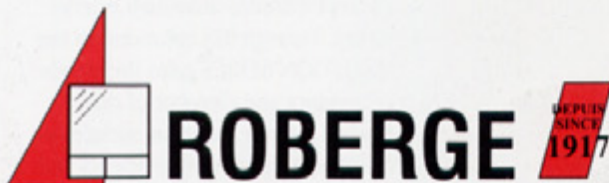

Exclusive Lifetime Warranty

All PVC components of the EVOLUTION SERIES are protected by the Spartech Profiles Exclusive Warranty. For more information, please consult our warranty certificate.
